TIPS FOR MANAGING DURING COVID19

• Remember that people have different coping styles. When faced with uncertainty some people feel an increased need to be productive and focus on external things under their control but others feel a need to be less active and focus on their internal needs. Neither strategy is right or wrong.

• Faculty, staff and students need to be prepared to be more patient and offer more support to others than they would in other times. Many people are working under novel, stressful conditions. Studying and testing may be occurring in chaotic environments.

• People may be experiencing resource insecurity. Worry about where their next meal comes from or how they will pay rent will interfere with their ability to focus on school or work.

• For those who are new to working and studying at home there are some things you can do to avoid burnout and help manage some of the chaos of working in close quarters with family.
  • Set up a defined space
  • Maintain a schedule, this includes turning of notifications on your phone if you are able to
  • Set boundaries with other members in our household

On Campus Support
• Monsour Counseling - open for crisis and psychiatry services from 9:00-1:00, Monday-Friday. Please call first (909-621-8202).
